To analyze Bitcoin's technical indicators, including RSI, trend, and momentum, I will follow these steps:

1. Fetch 60 days of historical price and volume data for Bitcoin to ensure a comprehensive analysis.
2. Calculate technical indicators such as RSI, SMA, EMA, and trend signals using the price data.
3. Analyze price trends and momentum using both price and volume data.

Let's proceed with these steps.

💰 Multi-Agent Crypto Investment Analyst

🤖 fetch me the price of bitcoin

🤖 Bitcoin is currently trading at $90,494 USD.

🤖 What are the technical indicators showing?

🤖 Bitcoin's technical indicators are currently showing bearish signals:

- **RSI (14):** 45.26, indicating neutral momentum (neither overbought nor oversold).
- **Current Price:** $90,500.38, below the $20-day$ SMA ($90,512.02), suggesting short-term bearishness.
- **SMA Comparison:** The 20-day SMA is below the 50-day SMA, indicating a long-term bearish trend.
- **Trend Signal:** Bearish overall.
- **7-day Return:** +0.37%, showing neutral momentum with weak strength.
- **30-day Return:** -4.19%, indicating a recent decline.
- **Volatility:** 38.73% annualized, which is moderate.

Overall, Bitcoin is showing bearish signals with stable volume trends and no significant buying or selling pressure.

-

Based on everything we've discussed, should I invest $10,000 in Bitcoin? I have medium risk tolerance.

Here's my plan to generate a comprehensive investment recommendation for you:

1. **Market Intelligence Agent**: Confirm Bitcoin's current price and market sentiment.
2. **Forecasting & Technical Analyst Agent**: Review the technical indicators (RSI, trend, momentum) we already have.
3. **Risk & Portfolio Agent**: Calculate Bitcoin's volatility and Value-at-Risk (VaR) for a $10,000 investment.
4. **Synthesis & Recommendation Agent**: Generate a BUY/SELL/HOLD recommendation based on all data, considering your medium risk tolerance.

This will provide a complete investment analysis with risk assessment and actionable recommendation.

Does this plan look good? Reply 'yes' to proceed or suggest any modifications.

sounds good to me

Here's a comprehensive investment analysis for Bitcoin based on your medium risk tolerance and the current market conditions:

Investment Analysis Report: Bitcoin

Executive Summary

The current recommendation is to **AVOID** investing in Bitcoin at this time. The risk assessment indicates a medium-high risk profile, which does not align well with your medium risk tolerance. The bearish trend and neutral momentum suggest potential downside, despite strong positive sentiment.

Market Intelligence

- Current Price: $90,518
- Market Sentiment: 72.83% bullish (strong positive sentiment)
- Market Cap Rank: #1

Technical Analysis

- Trend: Bearish
- RSI: 45.26 (neutral)

**Bitcoin Risk Assessment for a $10,000 Investment**

**Volatility:**
- **Annualized Volatility:** 35.36%
  - This means Bitcoin's price can swing ±35% over a year.
  - Daily price swings of ±2% are typical.

**Value-at-Risk (VaR):**
- **95% VaR:** $456.37 (4.56%)
  - On 95% of days, you won't lose more than $456.37.
  - On the worst 5% of days, losses could exceed this amount.

**Worst Historical Day:**
- **Worst 1-day loss:** $528.83 (5.29%)

**Interpretation:**
- Bitcoin exhibits significant volatility, with potential for l

**Bitcoin Investment Recommendation:**

**Risk Assessment:** Medium-High (Score: ~58/100)
- **Volatility Risk:** 35.36% × 1.5 = 53.04 (Moderate-high)
- **Downside Risk:** 4.56% × 5 = 22.8 (Low-moderate)
- **Momentum Risk:** Neutral = 50
- **Trend Risk:** Bearish = 80
- **Weighted Average:** 53.04×0.3 + 22.8×0.3 + 50×0.2 + 80×0.2 = ~5

**Signals Analysis:**
- **Bullish Signals:** Market sentiment (1pt) = 1 bullish signal
- **Bearish Signals:** Trend (2pts) = 2 bearish signals
- **Neutral Signals:** RSI (0), Momentum (0)
- **Net Signal Difference:** -1 (leaning bearish)

**Recommendation: AVOID** (Medium Confidence)
